NEW SANITISING DISINFECTANT SPRAY SYSTEM

Available in a 22L canister for large areas or a 500ml aerosol for smaller areas.

Ramsol Sanitiser Disinfectant Spray contains active biocides, specifically designed for the cleansing and disinfecting of hard and soft surfaces as well as tested and proven for use on skin. This product delivers residual action control of an extensive range of microorganisms while still protecting the skin. The Ramsol spray is a revolutionary mist spray designed to sanitise and disinfect difficult to reach and intricate areas with full surface coverage. This product deals rapidly and effectively with an extensive list of bacteria, viruses, fungi and moulds. Ramsol has been tested effectively against small non-enveloped viruses (Hardest-to-kill category). Viruses in this category can include Poliovirus, Norovirus and Feline Calicivirus. Ramsol has also been tested effectively against enveloped viruses (easiest-to-kill category). Viruses in this category can include Coronaviruses and Type A Influenza's.
